

The Transfermate API

Empower your business with integrated global payments

[Request Sandbox Access](#)

Embed the TransferMate international payments network directly into your workflow.

[Read our API Documentation](#)

Clear Documentation

Our documentation is written with developers in mind, making it easy to understand how our API works.

Test environment

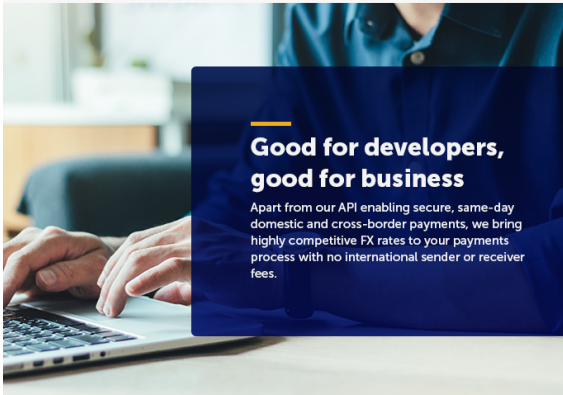

We provide teams with access to a TransferMate sandboxed account to allow end-to-end testing during the development cycle.

Security

Our tokenized, encrypted API connection is ISO 27001 & ISO 9001 accredited. Your data is protected using the strictest privacy policies and data security standards, and bank rails.

Dedicated Account Manager

The TransferMate account management team is on hand to support you through your integration.

Good for developers, good for business

Apart from our API enabling secure, same-day domestic and cross-border payments, we bring highly competitive FX rates to your payments process with no international sender or receiver fees.

- Reduce your admin workload
- Eliminate payment errors & delays
- Save money on bank fees

API use cases

Invoice Payment

Payroll

Intercompany Transfers
